

Home Solar 2 _Table lamp

The Home Solar 2 table lamp is designed for outdoor use and features an integrated solar panel, allowing it to operate without connection to the electrical grid. The painted die-cast aluminum body includes a handle, making it easy to carry and suitable for different applications. The diffuser is made of opal polycarbonate. The lamp includes a dusk sensor that can be activated via switch: when the orange indicator is on, the lamp switches on automatically below 50 lux. In manual mode (blue indicator), the lamp remains on and the light intensity is adjusted via touch dimmer. The IP54 protection rating ensures resistance to weather conditions. The Home Solar 2 table lamp can be recharged by solar energy or via USB-C. It is also prepared for wall mounting using an optional accessory.

- LED
- dimmable
- IP54
