

Home Solar 2 _Floor lamp

The Home Solar 2 floor lamp is a portable solution for outdoor lighting, operating without connection to the electrical grid thanks to its integrated solar panel. The painted die-cast aluminum structure includes a handle that makes the lamp easy to move and practical in different situations. The diffuser is made of opal polycarbonate. The lamp features a dusk sensor activated via switch: in automatic mode (orange indicator), it switches on when ambient light drops below 50 lux. In manual mode (blue indicator), brightness can be adjusted via touch dimmer. The IP54 protection rating makes it suitable for gardens, terraces and outdoor pathways. The lamp is equipped with a wall-mounting support and a weighted base, which provide stability and flexibility for outdoor use. It can be recharged via solar energy or through USB-C.

LED dimmable IP54
