

Barbell Solar _Floor lamp

Barbell Solar RF is a cordless, rechargeable battery floor lamp designed to provide maximum freedom of use in both outdoor and indoor environments. Equipped with an integrated solar panel, it combines technology, practicality, and versatility in a lighting solution created for terraces, gardens, patios, and contemporary living spaces.

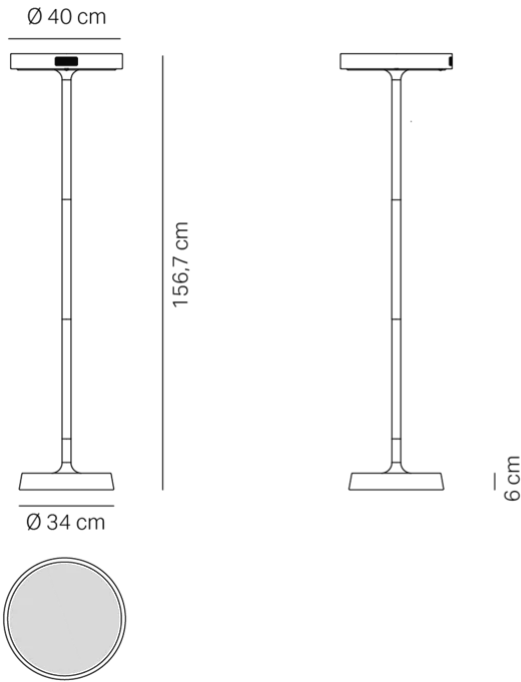

Thanks to its IP65 rating, Barbell Solar RF is suitable for outdoor use and resistant to weather conditions. The structure is made of molded plastic and painted aluminum, materials selected to ensure lightness, reliability, and long-lasting durability.

The lamp integrates a dusk sensor and a motion sensor that automatically activate and adjust the light according to ambient brightness and the presence of people, improving comfort and energy efficiency. The LED lighting can be controlled manually or remotely via radio frequency, thanks to the included remote control.

Barbell Solar RF allows users to customize the lighting atmosphere through **4-step dimming** and the selection of four preset color temperatures (2200K, 2700K, 3000K, and 4000K), adapting to different moments and needs.

One of the collection's distinctive features is the possibility to configure the lamp at different heights: the included rod kit allows the stem to be adjusted from a minimum of 71 cm up to a maximum of 157 cm, easily transforming the lamp's presence within the space. To further enhance functionality, an adjustable-height shelf is also available, attaching to the lamp stem and providing a convenient support surface for glasses, bottles, or small objects.

The battery can be recharged directly through the solar panel or via USB-C cable, ensuring practical and flexible use in every situation. Available in black, corten, and sage finishes, Barbell Solar RF brings discreet, functional, and contemporary lighting to your spaces.
